About me

Applied computer technology student at OsloMet, specialising in programming, graduating June 2027. I want to work with backend and full-stack development. I am also a registered nurse with several years in healthcare, including shifts as lead for a full team. There I used clinical systems every day and saw how much it matters that a system fits the work. Alongside my studies I work at the OsloMet IT service desk and as a medical adviser.

Education

BSc Applied Computer Technology · OsloMet · programming · 2024 – 2027

BSc Nursing · VID Specialized University · 2021 – 2024

Projects

Jeoparty Side project github.com/sakh26/Jeoparty demo
Jeopardy game with question packs, an editor and Spotify via OAuth 2.0 PKCE. React, TypeScript, Vitest.

Learning Academy School project
Learning platform with quizzes and points, team of five. ASP.NET Core MVC and an API with React. C#, TypeScript, SQLite.

Portfolio website github.com/sakh26/sakh26.github.io
Interactive CV and portfolio in Norwegian and English, with light/dark theme and a downloadable CV. React, Vite.

Wedding website In progress
Full-stack wedding site with QR code RSVP and an admin page for table seating. Python (FastAPI), React, PostgreSQL.

Experience

Student Assistant, IT Service Desk · OsloMet · Oct 2025 – present

- Assist students and staff with IT-related questions and issues
- Incident handling and guidance on IT systems, with administrator access in Microsoft Entra ID (Azure AD) and Intune
- Setup, loan and handout of PCs and equipment

Medical Adviser · Vertikal Helse / If Insurance · Jun 2025 – present

- Advise customers and providers on health services, with strict demands on precision and documentation

Support Worker · Edvard Munch VGS, City of Oslo · Sep 2024 – Jun 2025

- Helped create a safe school environment, working with teachers and counsellors

Registered Nurse and Care Assistant · Kristiansand and Oslo · Jan 2019 – Aug 2024

- Shift lead for a full team: prioritised tasks and made decisions under pressure
